

# DEG SERIES

## Portable Air Conditioner

### HIGH EFFICIENCY

#### Splash motor system Condensing Water Auto Evaporation No manual drainage required !

- Equipped with water splash motor. Normally the motor splashes the water into very small particles and splashes onto the condenser, then the water is evaporated and exhausted out together with the hot air. In a word, no manual drainage needed.
- Supposed water spray motor is broken down, the water will be led into the tank fixed inside, a full tank alarm will remind you to repair the motor, when the tank is full.

#### Double Condenser Technology

The condenser is thicker and larger, super strong to evaporate all excessive water.

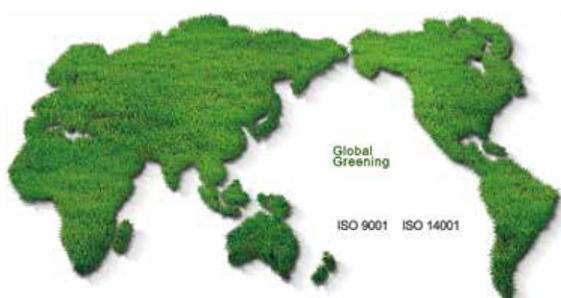

#### Rotary compressor

More efficient, super low noise.

#### Environment Concern

Environment protection and Energy saving is our responsibility and company Philosophy

## Features

4 in 1

Water Auto-evaporated

No Water Drainage Needed

Heat Pump

Sleep Mode

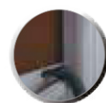

Touch Control

4-direction Air Swing

24 Hour timer

Easy Window/Wall Connection

Direct-Wash Filter

- 4 in 1 function
- Auto swing
- Automatic water evaporation
- Rotary compressor
- LED display
- Super low noise

- 3 fan speeds
- Electronic control with:24hr timer
- Rolling castors
- Touch control
- Remote control
- With wire hook
